Chicago, IL 60604

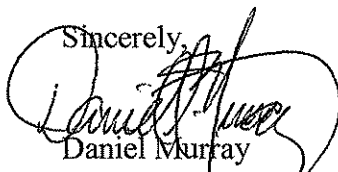

Re: Indiana's Network Monitoring Plan

Dear Ms. Newton:

The Office of Air Quality of the Indiana Department of Environmental Management is submitting Indiana's 2010 Ambient Air Monitoring Annual Network Plan. It identifies Indiana's network as it currently exists along with any changes proposed for 2010. Included in Appendix A is a listing of the comments received from the public regarding the plan and the responses to those comments. Indiana is also submitting the Network Plans for the NCore Monitoring Site at Washington Park (Appendix B) in Indianapolis and for the 2010 Lead Monitoring Network (Appendix C).

The plans had been available to the public for their review and comment on the IDEM's website from May 14 through June 22. A public meeting with a Webinar link was also held on June 10. The final plan will be posted to <http://www.in.gov/idem/5342.htm>.

We await EPA's approval. If you have any questions, they can be directed to Steve Lengerich, 317-308-3264 or slengeri@idem.in.gov.

Sincerely,

Daniel Murray
Assistant Commissioner
Office of Air Quality
